Post-doctoral research fellow position at McGill University

A post-doctoral research position is available at the Research Institute of McGill University Health Centre (RI-MUHC) to work on collaborative, CIHR-funded research studies between McGill, University of Quebec at Montreal (UQAM) and the University of Montreal on immunity during HIV infection. The candidate will be supervised by Dr Cecilia Costiniuk, Assistant Professor in Infectious Diseases at McGill.

Qualifications :

- PhD degree in immunology, virology, biochemistry or a related field.
- Strong interest in working with human specimens and HIV.
- Laboratory experience in primary cell culture, molecular biology and immunology.
- Experience and proficiency with multi-colour flow cytometry.
- Ability to guide and supervise student experiments.
- Significant scientific contributions and excellent communication skills are required.

Salary:

A competitive salary is guaranteed based on the CIHR salary ranks

How to apply:

Please submit your CV, a cover letter and the names and contact information of three referees in one PDF document to Dr Costiniuk (post.immunology.2017@gmail.com).
